Volume 14 No. 2

April, May, June 2009

Revised Regulations Effective January 23, 2009

Following a public hearing on December 11, 2008, the Board revised the following eight regulations. Each regulation is printed in its entirety with additions in **bold** and a brief explanation of the changes at the end of each. A complete copy of all the Board's statutes and regulations can be downloaded in pdf format from our website, www.kansas.gov/ksbtp. Also included below is a sample of the Board-approved form for reporting mentoring activities. This form can also be downloaded from the website.

K.A.R. 66-11-5. Admission requirements for fundamentals of surveying examination.

- Each application shall be reviewed by the board to determine whether the requirements for admission to take the fundamentals of surveying examination have been met. Once the board establishes that these requirements have been met, the applicant shall be allowed to sit for the examination.
- Each applicant shall meet one of the following requirements for admission before taking the examination:
 - Graduation from an accredited land surveying curriculum, as defined in K.A.R. 66-9-5 (b) and (c);
 - successful completion of the land surveying curriculum specified in K.A.R. 66-9-5(e); or
 - verification of a combination of education and experience of a character satisfactory to the board. In evaluating an applicant's record, a determination shall be made by the board of whether, based on the applicant's educational background, the applicant requires no more than four years of additional progressive land

surveying experience to qualify for admission to the practice of surveying examination. (Authorized by K.S.A. 74-7013; implementing K.S.A. 74-7022 and 74-7023; effective Nov. 1, 2002; amended Feb. 3, 2006; amended June 29, 2007; amended Jan. 23, 2009.)

Paragraph (b)(4) was eliminated. The provision for admission based on experience only is no longer available.

K.A.R. 66-12-1. Minimum standards for the practice of land surveying. The board hereby adopts by reference the following:

- The "2005 minimum standard detail requirements for ALTA/ACSM land title surveys";
- the "accuracy standards for ALTA/ACSM land title surveys," published in 2005; and
- the "Kansas minimum standards for boundary surveys and mortgagee title inspections standards of practice #1" adopted by the Kansas society of land surveyors and last amended on October 23, 1998, except that the preface and scope sections shall be deleted. (Authorized by K.S.A. 74-7013; implementing K.S.A. 74-7037; effective May 4, 1992; amended Feb. 14, 1994; amended Feb. 13, 1995; amended March 1, 1996; amended Feb. 4, 2000; amended Jan. 23, 2009.)

This existing regulation is being revised to reflect the current version of the minimum standard detail requirements for ALTA/ACSM land title surveys.

K.A.R. 66-14-1. Requirements.

- Each **licensee** shall have completed 30 professional development hours (PDHs) of acceptable continuing education requirements during the two-year period immediately preceding the biennial renewal date **established in K.A.R. 66-6-6** as a condition for license renewal. If the licensee exceeds the requirement in any renewal period, the licensee may carry a maximum of 30 PDHs forward into the subsequent renewal period.
- Commencing with the renewal of licenses that expire on March 31, 2010, each land surveyor shall have completed, as part of the 30 PDHs required, at least two PDHs of continuing education activity on the Kansas minimum standards adopted by reference in K.A.R. 66-12-1(c).** (Authorized by and implementing K.S.A.

74-7013 and 74-7025; effective March 1, 1996; amended Feb. 4, 2000; amended Jan. 23, 2009.)

This existing regulation is being condensed and revised to include a requirement that, beginning with licenses that expire on March 31, 2010, each land surveyor shall have completed two PDHs on Kansas minimum standards as part of the 30 PDHs required for renewal.

K.A.R. 66-14-2. Definitions. The terms used in this article shall have the following meanings:

- "Contact hour" means one clock-hour of not less than 50 minutes.
- "Continuing education activity" means an activity that enhances a licensee's level of technical, professional, managerial, or ethical competence in order to further the goal of protecting the health, safety, and welfare of the public.
- "Continuing education unit" (CEU) means a unit of credit customarily used for continuing education courses.
- "Dual licensee" means a person who is licensed in two or more technical professions.
- "Mentoring" means guiding or tutoring another individual in the areas of technical, professional, managerial, or ethical competence in the technical professions.
- "Professional development hour" (PDH) means a unit of credit given by the board for participation in a continuing education activity as specified in this article.
- "Sponsor" means an individual, organization, association, institution, or other entity that provides an educational offering for the purpose of fulfilling the continuing educational requirements of these regulations. (Authorized by and implementing K.S.A. 74-7013 and 74-7025; effective March 1, 1996; amended Jan. 23, 2009.)

This existing regulation is being revised to include definition for mentoring and to revise the definitions of continuing education activity and professional development hour.

K.A.R. 66-14-3. Continuing education activities.

- Continuing education activities that satisfy the continuing education requirement shall include the following:
 - Attending professional or technical presentations at meetings, conventions, or conferences;
 - attending in-house programs sponsored by corporations or other organizations;
 - successfully completing seminars, tutorials, short courses, correspondence courses, televised courses, or videotaped courses;
 - making professional or technical presentations at meetings, conventions, or conferences;
 - teaching or instructing, as described in K.A.R. 66-14-5(a)(2);
 - authoring published papers, articles, or books;
 - serving as an officer or committee member of a technical profession society or organization, as described in K.A.R. 66-14-5(a)(4);**
 - successfully completing courses sponsored by a college or university;
 - successfully completing courses that are awarded continuing educational units; and

AGENCY MISSION

To provide maximum protection of the health, safety and welfare of the people of Kansas by assuring that the practice of engineering, architecture, land surveying, landscape architecture and geology in the state is carried out only by those persons who are proven to be qualified as prescribed by the statutes and rules and regulations of the Board of Technical Professions.

Programs Established To Assist With Agency Mission
Licensing, monitoring and regulating
of technical professions:

- Examine and certify Intern Engineers
- License, monitor and discipline Engineers
- License, monitor and discipline Architects
- License, monitor and discipline Land Surveyors
- License, monitor and discipline Landscape Architects
- License, monitor and discipline Geologists
- Licensing of Professional and General Corporations

BOARD STAFF

Routing your calls to the numbers below will allow our staff to better assist you by answering questions about the areas they handle. You may also leave a message on our voice mail if we are unavailable and we will return your call promptly.

DISCIPLINARY ACTION TAKEN BY THE BOARD

Disclaimer: Every effort has been made to ensure that the following enforcement information is correct; however, this information should not be relied upon without verification from the Kansas board office. It should be noted that the names of companies and individuals listed may be similar to the names of parties who have not had enforcement actions taken against them. Disciplinary orders are public information and copies may be obtained by contacting the board office.

Mark L. Bennett Jr.

IN THE MATTER OF CHARLES CULLUM, LS

Summary:
On March 4, 2008, The Kansas State Board of Technical Professions received a letter of inquiry from Louise Nichols concerning a survey of certain property she owned in Arkansas City, Ks. The survey in question was performed by Charles Cullum, a Kansas licensed land surveyor. Following receipt of the letter of inquiry, the Board directed that an investigation be conducted by one of its investigators for the purpose of providing an opinion to the Board regarding whether or not Mr. Cullum had deviated from generally accepted land surveying practices and/or from the minimum standards for boundary surveys when he performed the survey in question.

Board Action:
Following the completion of the requested investigation, Charles Cullum and the Kansas State Board of Technical Professions entered into a Settlement Agreement and Consent Order which included the following provisions:

1. In performance of said survey, Mr. Cullum deviated from accepted land surveying standards and/or the minimum standards for boundary surveys in the performance of said survey by failing to conform his practice to the minimum standards for the practice of land surveying and by his failure to take into consideration existing monumentation that conflicts with the theory of re-surveying based on section lines.
2. Mr. Cullum failed to file required reference reports concerning said survey with the Kansas State Historical Society and/or the County Surveyors Office as required by KSA 58-2011.
3. Mr. Cullum shall immediately conform his land surveying practices to generally accepted land surveying practices in the State of Kansas and to the minimum standards for boundary surveys as adopted by the Kansas State Board of Technical Professions in K.A.R. 66-12-1.
4. Mr. Cullum shall file the required reference reports with the Kansas State Historical Society and the

County Surveyor on or before December 15, 2008 and shall provide written proof of said filing to the Kansas State Board of Technical Professions on or before December 15, 2008.

5. Mr. Cullum shall pay all expenses of the Board including attorney and investigation fees incurred in the investigation and prosecution of this matter in the amount of \$785.00 and a fine in the amount of \$500.00 for a total of \$1,285.00 with said fine and expenses to be paid no later than December 1, 2008.

Status:
Mr. Cullum has now paid the fine and costs imposed in this matter and has fulfilled all of the terms of the Settlement Agreement and Consent Order and the case file has been closed.

IN THE MATTER OF LYNN BEZNER, L.S. AND TOPOGRAPHIC LAND SURVYORS

Summary:
On April 28, 2008, The Kansas State Board of Technical Professions received a Report of Alleged Violation Form concerning the land surveying practices of Topographic Land Surveyors and V. Lynn Bezner, a Kansas licensed land surveyor, regarding a survey performed in Morton County, Kansas. As a result of said report, the Complaint Committee of the Board directed that the matter be investigated by one of the Board's licensed land surveyor investigators. Said investigation resulted in the determination that Topographic Land Surveyors and V. Lynn Bezner had deviated from generally accepted land surveying practices and/or from the minimum standards for boundary surveys when said survey was performed.

Board Action:
Following the completion of said investigation by the Board, Mr. Bezner and the Kansas State Board of Technical Professions entered into a Settlement Agreement and Consent Order which included the following terms:

1. In the course of Mr. Bezner's conduct of the survey in question, he failed to file with the Kansas State Historical Society and/or the County Surveyor of Morton County, Kansas the section corner reports required by the provisions of KSA 58-2011.
2. In addition, during the course of the investigation, the investigator determined that Mr. Bezner had failed to file the required section corner reports with the Kansas State Historical Society and/or the Morton County Surveyors office on four other occasions.
3. Mr. Bezner shall immediately conform his land surveying practices to generally accepted land surveying practices in the State of Kansas and to the minimum standards for boundary surveys as

adopted by the Kansas State Board of Technical Professions in K.A.R. 66-12-1.

4. Mr. Bezner shall file the required reference reports with the Kansas State Historical Society and the County Surveyor on or before December 15, 2008 and shall provide written proof of said filing to the Kansas State Board of Technical Professions on or before December 15, 2008.
5. Mr. Bezner shall pay all expenses of the Board including attorney and investigation fees incurred in the investigation and prosecution of this matter in the amount of \$473.00 and a fine in the amount of \$500.00 for a total of \$973.00 with said fine and expenses to be paid no later than December 1, 2008.

Status:
Mr. Bezner has now paid the fine and costs imposed in this matter and has fulfilled all of the terms of the Settlement Agreement and Consent Order and the case file has been closed.

IN THE MATTER OF KENTON KNOWLES, UNLICENSED AND GLOBAL HOMES

Summary:
In April 2006, the Kansas State Board of Technical Professions received an inquiry concerning what was believed to be the unlicensed practice of architecture by Kenton Knowles and Global Homes. Following an investigation of that inquiry, the Complaint Committee of the Board was of the opinion that Mr. Knowles and Global Homes had in fact engaged in the unlicensed practice of architecture.

Board Action:
Following the completion of the investigation, the Board proposed to Mr. Knowles and Global Homes that the matter be resolved by way of a Settlement Agreement and Consent Order. After numerous delays regarding disposition of this matter, which had been requested by Mr. Knowles and which extended over a period of approximately 18 months, the Board determined that it was not going to be possible to resolve the case on an agreed basis.

Disciplinary Action continued on page 4

Disciplinary Action continued from page 3

Due to the inability to obtain a settlement of the matter, the Complaint Committee of the Board then directed that a formal hearing be scheduled in order for the complaint to be resolved. At the request of Mr. Knowles and Global Homes, the hearing was continued until September 24, 2008. Although Mr. Knowles and Global Homes were advised of the hearing date and time, neither of them appeared for the hearing and no representative appeared on their behalf. The matter then proceeded to hearing and following the presentation of evidence on the Board’s behalf, the hearing panel determined that both Global Homes and Kenton Knowles had engaged in the unlicensed practice of architecture in the State of Kansas and on October 23, 2008, a Final Order was entered in the case. The panel also made certain findings of fact and conclusions of law which were included in said Final Order, which are as follows:

1. On August 28, 2008, the Complainant’s attorney mailed the complaint and a Notice of Hearing to Respondent by certified mail, return receipt requested, advising that a hearing would be held on September 24, 2008 at the Board office at 9:00 a.m. The Notice admonished the Respondent that should he fail to attend, he would be held in default.
2. The certified mail was picked up on August 29, 2008.
3. On September 16, 2008, the Board’s Executive Director was contacted by Respondent Knowles inquiring as to a continuance because of plans to be in California attending a trade show. Respondent was advised that any request should be in writing but that any such request would not be looked upon favorably for two reasons: (1) the Board had previously granted a continuance at Respondent’s request when the hearing was initially scheduled for June 11, 2007; and (2) any request would be untimely as the Notice of hearing required a continuance request to be filed within 7 days of receipt of the Notice of Hearing.
4. Respondents did not appear at the hearing. Accordingly, the Board determined that Respondents were in default pursuant to KSA 77-520.
5. On September 26, 2008, a Notice of Proposed Default Order was mailed, by certified mail, return receipt requested, advising Respondents of the opportunity to request that the default order be vacated. The return receipt was signed on October 8, 2008 by Charlotta Knowles. No motion to vacate was forthcoming.
6. As Respondents are in default, paragraphs 1 through 4 in the Complaint are uncontested and admitted as true.
7. Neither Respondent is authorized to practice architecture. Regardless, both Respondents offered to practice architecture by virtue of a web site. The web site offers both residential and commercial services.
8. This is not the first time Respondents have held themselves out as authorized to practice architecture. The first time occurred in 2004 through the medium of a telephone book advertisement. Respondent Knowles apologized and agreed to cease and desist from advertising that he is authorized to practice architecture in Kansas.
9. The Board’s costs in this matter, including attorney fees, total \$1,963.41.
10. As a Motion to Vacate the Proposed Default Order has not been filed within the seven day time period

set forth in KSA 77-520, the Proposed Default Order is now effective. Therefore, the Presiding Officers can conduct any further proceedings necessary to complete the adjudication without the participation of the Respondent.

11. Neither Respondent is authorized to practice architecture either individually or in corporate form. Yet, both offered to practice architecture by virtue of a web site advertising both residential and commercial services. Accordingly, there is clear and convincing evidence that both Respondents violated KSA 74-7001.

As a result of the findings of fact and conclusions of law as set out above, the panel entered its Final Order, which indicated that in view of the fact that this is Mr. Knowles’ second violation of KSA 74-7001, that Mr. Knowles’ conduct was willful, the panel further found that this willful conduct, coupled with Mr. Knowles’ cavalier attitude towards the Board’s authority, warrants the imposition of a fine and payment of the Board’s costs, including attorney fees and Respondents were ordered to pay to Board the costs of this proceeding, including the Board’s attorney fees in the amount of \$1,963.41 and to pay a fine in the amount of \$3,036.59 for a total of \$5,000 with said amount to be paid within 45 days from the date on the certificate of service. The panel further ordered that the Respondents are to cease and desist from offering to practice architecture and/or practicing architecture until such time as Respondent Knowles is licensed by the Board and Global Homes has secured a certificate of authorization pursuant to KSA 74-7036.

Status:
Neither Global Homes nor Kenton Knowles have paid the fine and costs imposed in this matter and the Board is now taking steps to recover said fine and costs.

IN THE MATTER OF HOMER L. GILSON, L.S.

Summary:
On January 28, 2005, the Kansas State Board of Technical Professions received a Report of Alleged Violation Form concerning the land surveying practices of Homer L. Gilson, a Kansas licensed land surveyor, regarding his performance of three surveys performed in Barber County, Kansas. As a result of said report, the Complaint Committee of the Board directed that the matter be investigated by one of the Board’s licensed investigators. Said investigation resulted in the opinion of the investigator that Mr. Gilson had deviated from generally accepted land surveying practices and/or from the minimum standards for boundary surveys when said survey was performed, to wit:

1. Mr. Gilson did not have an understanding of the significance of the permanent survey statutes in Kansas and his opinion that only those monuments set by the GLO are valid and that those set by county surveyors, under official function, are without importance is a serious deviation from generally accepted land surveying practices and the minimum standards for boundary surveys.
2. Mr. Gilson did not follow the requirements of KSA 19-1409 dealing with the method of subdividing sections into quarter sections while setting the center of a section.
3. Mr. Gilson performed insufficient research in conducting the three surveys in question.
4. Mr. Gilson failed to properly excavate for section corners.
5. Mr. Gilson’s use of “parole evidence” was not properly done on two of the surveys.
6. Mr. Gilson demonstrated a lack of understanding of

certain land surveying terms such as “single point procedure” and “parole evidence”.

Board Action:
Following the completion of said investigation by the Board, a formal complaint was filed regarding Mr. Gilson’s land surveying practices and he declined to resolve the matter by way of a Settlement Agreement and Consent Order.
Thereafter, on May 23, 2007, the complaint was set for a formal hearing before a hearing panel of the Board. At the conclusion of that hearing, the panel entered its initial order in which they found in part that:

1. That Respondent had surveyed three properties, however, in surveying these properties, the Respondent did not put sufficient effort in to recovering the original location markers, specifically there was no attempt to excavate to look for original corner monuments. Instead, Respondent used collateral evidence to set the monuments and his failure to excavate or dig for original monuments is not a generally accepted land surveying practice.
2. While Mr. Gilson maintained that he followed the Bureau of Land Management (BLM) standards on lost and obliterated corners, the BLM states that the Bureau “assumes no control or direction over the acts of local and county surveyors in the matter of subdivisions of sections and the re-establishment of lost corners of the original surveys where the lands have passed into private ownership.
3. In conducting one of the surveys, Respondent failed to consult with various sources that would have assisted him in locating the original monuments, such as permanent survey books.
4. In resetting the west quarter corner on one of the properties surveyed, Mr. Gilson did so by relying upon parole evidence given to him by his client rather than utilizing the procedure specified in KSA 19-1409, which deals with subdividing sections into quarter sections.
5. Respondent failed to understand the significance of the permanent survey statutes in his primary reliance of the GLO and not on local records is a serious deviation from generally accepted land surveying practices and the minimum standards for boundary surveys.
6. Mr. Gilson failed to follow KSA 19-1409 when setting the center of Section 29-30-15W.

In its order as outlined above, the panel also noted that “while respondent deviated from generally accepted land surveying practices and the minimum standards for boundary surveys, such deviation was not willful and stems from ignorance of Kansas laws and procedures. Therefore, while we reprimand respondent from deviating from generally accepted land surveying practices and the minimum standards for boundary surveys, respondent’s ignorance can be addressed by education. Therefore, respondent shall attend the two hour course on the minimum standards for boundary surveys sponsored by the Kansas Society of Land Surveyors in Salina, Kansas on January 10-12, 2008 and provide proof to the Board within 7 days thereafter.
In addition to requiring attendance at the course, the panel also ordered that Mr. Gilson pay the Board’s costs, including attorney fees, in the amount of \$3,447.62 to be paid within 90 days from the date of said order.
Following the entry of the aforementioned decision, Mr. Gilson exercised his right to appeal the Board’s order to the District Court of Shawnee County, Kansas. Thereafter on October 29, 2008, Shawnee County District Judge, Franklin R. Theis, entered his Memorandum Opinion and Entry of Judgment affirming the decision of the hearing panel and the sanctions imposed.

Status:
On December 29, 2008, Mr. Gilson forwarded to the Kansas State Board of Technical Professions his check in the amount of \$3,447.62 in payment of the fine and costs imposed in this matter. Although Mr. Gilson was initially ordered to attend the two hour course on the minimum standards for boundary surveys sponsored by the Kansas Society of Land Surveyors in Salina, KS on January 10-12, 2008, his appeal to the District Court of Shawnee County, Kansas delayed that requirement until January 8, 2009. Mr. Gilson has provided the Board office with proof of his attendance at the course. He has fulfilled all of the terms of the Settlement Agreement and Consent Order and the case file has been closed.

Revised Regulations continued from page 1

- (10) mentoring **one or more** individuals who are preparing for licensure, as described in K.A.R. 66-14-5(a)(8).
- (b) **Each of the continuing education activities identified in paragraphs (a)(1), (2), (3), (8), and (9) shall meet all of the following criteria:**
- (1) **The activity has a definable purpose and objective.**
 - (2) **The program is conducted by a person qualified in the subject area.**
 - (3) **The licensee retains a record of registration and attendance.**

(Authorized by and implementing K.S.A. 74-7013 and 74-7025; effective March 1, 1996; amended Feb. 4, 2005; amended Jan. 23, 2009.)

This revision adds the continuing education activity criteria that were formerly contained in 66-14-4.

K.A.R. 66-14-4. (Authorized by K.S.A. 74-7013, as amended by L. 1995, ch. 104, sec. 1; implementing K.S.A. 74-7025, as amended by L. 1995, ch. 104, sec. 1; effective March 1, 1996; revoked Jan. 23, 2009.)

This regulation is being revoked. The criteria formerly contained in this regulation have been included in K.A.R. 66-14-3.

K.A.R. 66-14-5. Computation of credit.

- (a) Continuing education credits shall be measured in professional development hours (PDHs) and shall be computed as follows:
- (1) Successfully completing one **contact** hour of professional development education in coursework or seminars or making professional or technical presentations at meetings, conventions, or conferences shall be the equivalent of one PDH.
 - (2) Teaching or instructing, as specified in K.A.R. 66-14-3(a)(5), shall constitute **four PDHs** for each contact hour spent in the classroom. Teaching credit shall be valid for teaching a course or seminar in its initial presentation only. Full-time faculty at a college, university, or other educational institution shall not receive teaching credit for teaching their regularly assigned courses.
 - (3) Authoring a published paper, article, or book shall be the equivalent of 10 PDHs.
 - (4) **Serving as an officer or committee member** of a technical profession society or organization shall be the equivalent of two PDHs. Professional development hours shall be limited to two PDHs for each organization and shall not be earned until the completion of each year of service.

- (5) Successfully completing one university semester hour of credit shall be the equivalent of 45 PDHs.
 - (6) Successfully completing one university quarter hour of credit shall be the equivalent of 30 PDHs.
 - (7) Successfully completing one continuing education unit shall be the equivalent of 10 PDHs.
 - (8) Mentoring one or more individuals who are preparing for licensure shall be limited to **six PDHs** each year.
- (b) Final authority shall rest with the board, with respect to the approval of **continuing education activities**. (Authorized by and implementing K.S.A. 74-7013 and 74-7025; effective March 1, 1996; amended Nov. 2, 2001; amended Feb. 4, 2005; amended Jan. 23, 2009.)

The number of PDHs allowed for mentoring is increased from five per year to six per year.

K.A.R. 66-14-7. Records.

- (a) Each licensee shall maintain records on forms prescribed and furnished by the board to support the professional development hours claimed by the licensee.

The records shall include the following:

- (1) A log showing the type of activity claimed, **the number of** professional development hours earned, **and other information as applicable; and**
- (2) **supporting documentation, which may include documentation of any of the following:**
 - (A) **Presentations or attendance at meetings, conventions, conferences, programs, seminars, and similar activities, which shall be documented by** verification records in the form of completion certificates or other documents supporting evidence of attendance;
 - (B) **authoring published papers or books, which shall be documented by proof of publication; or**
 - (C) **mentoring, which shall be documented by completion of a board-approved form signed by both the mentor and the mentored individual indicating dates and a description of the activities.**
- (b) The licensee shall maintain the records for at least four years **and shall provide a copy to the board, upon request.** (Authorized by and implementing K.S.A. 74-7013 and 74-7025; effective March 1, 1996; amended Jan 23, 2009.)

This existing regulation is being revised to include a more detailed list of the types of supporting documentation to be used.

Kansas State Board of Technical Professions

Mentoring Reporting Form

This form is to be used to report mentoring activities. Mentoring one or more individuals who are preparing for licensure is limited to six PDHs per year. (Please use one form for each mentee. Use additional forms if more space is needed.)

Licensee (Mentor) Name: License Number: _____

Mentee Name: _____

Mentored from _____ to _____

Mentor: Please list topics you have mentored the mentee on during this period.

Signature of Mentor Date

Mentee: Please give a brief statement on what you have learned during this period.

Signature of Mentee Date

Form available on the website.

NCARB Launches Electronic Reporting System

The National Council of Architectural Registration Boards (NCARB) officially launched the electronic Experience Verification Reporting system (e-EVR) on December 31, 2008. Interns are able to report their experience for the Intern Development Program (IDP) online through “My NCARB Record” instead of sending in paper forms. Electronic submissions replace paper submissions as the standard way interns submit experience reports to complete the IDP. Interns are strongly encouraged to use the e-EVR.

The e-EVR has been extensively tested both internally and externally, to ensure a positive user experience. Testers have included an independent consultant, ICP International; representatives from the American Institute of Architects (AIA), American Institute of Architecture Students (AIAS), National Associates Committee (NAC), and IDP Coordinators; three groups of Washington, DC area architects and interns; and a panel appointed by NCARB President Gordon E. Mills, FAIA consisting of current and former Member Board Members, a Member Board Executive, an external tester, and a recently licensed architect.

In order to help both interns and supervisors make the transition to electronic reporting, NCARB has developed a webcast and podcast which is available on the NCARB web site for download.

The e-EVR makes it easier for interns to submit experience reports and for supervisors to review and approve the reports. Once submitted by the intern, the report will be saved instantly within their Record and a

link to the report will be sent to the identified supervisor.

The supervisor reviews the report online and have the option to approve, return for edits, or reject the report. Once the supervisor acts on the report, it will be saved to the intern’s Record with the updated status. All reports are subject to NCARB’s final review once an intern completes the IDP. *IDP Supervisor Guidelines* have been produced to aid supervisors with their role in the IDP and is available on NCARB’s web site.

Interns are able to view the status of all reports entered through the e-EVR. They are also able to view their progress through the IDP and identify any deficiencies so they can work with their supervisor and mentor to develop a plan to gain exposure in those areas.

The e-EVR is designed to prevent common errors that currently occur on paper forms, reducing the possibility of rejections during the NCARB evaluation process. The e-EVR will also check that the report meets the Six-Month Rule requirements when the rule is implemented.

Interns can save an experience report as a work-in-progress and submit it to the supervisor at a later date. They may also enter reports over any timeframe until the Six-Month Rule is phased in between July 2009 and July 2010. For more information on the Six-Month Rule visit <http://www.ncarb.org/idp/SixMonRul.html>.

The e-EVR is an integral part of NCARB’s Business Process Reengineering Plan to improve customer service. The e-EVR adds transparency to the IDP reporting process and will reduce processing times.

NCARB’s New Office Earns LEED-Silver Certification

The National Council of Architectural Registration Boards (NCARB) is pleased to announce that our new office space has achieved a LEED-Silver certification from the U.S. Green Building Council’s (USGBC) Leadership in Energy and Environmental Design (LEED) Green Building Rating System™.

The NCARB office relocated in December 2007 to a new suite at our address of 1801 K Street in Washington, DC; a move precipitated by the sale of the building and an extensive building renovation program. The new space, designed by Gensler’s District of Columbia office, provided NCARB an opportunity to incorporate sustainable design principles and materials in a space that better reflects the Council’s strategic reorganization implemented last year. Achieving the LEED-Silver rating was an especially rigorous process, as the building’s new owners did not incorporate environmental or sustainable design principles in the building’s renovation.

NCARB received 28 credits under the LEED for Commercial Interiors system. The credits were earned in a variety of ways including recycling of building materials, reusing our existing furniture, purchasing fixtures and finishes produced within close proximity to the DC-metro area, and installing energy-saving appliances, special light fixtures, and daylight responsive controls. A long-term lease, close proximity to public transportation, and an extensive recycling program also contributed to the achievement.

According to the USGBC’s web site, “LEED for Commercial Interiors is the recognized system for certifying high-performance green interiors that are healthy, productive places to work; are less costly to operate and maintain; and have a reduced environmental footprint.”

(Reprinted from NCARB *News Clips*, December 9, 2008.)

NCARB IDP Supervisor Guidelines Now Available

The National Council of Architectural Registration Boards (NCARB) has developed the *IDP Supervisor Guidelines* to assist supervisors in the crucial role they play in the careers of interns in the Intern Development Program (IDP). The guidelines are available to download on NCARB’s web site, <http://www.ncarb.org/forms/superguide.pdf>.

A supervisor’s knowledge, guidance, and support are valuable to the development of an intern and add to the long-term quality of the profession. The *Supervisor Guidelines* explain the objectives and requirements of the IDP and give architects a better understanding of interns’ expectations.

Navigating and completing IDP is every intern’s responsibility. Supervisors are encouraged to teach, motivate, and help interns fulfill the requirements of the program throughout their journey to licensure. The guidelines offer a starting point to help develop and implement successful relationships that are beneficial to individuals, firms, and the profession.

NCARB has available a webcast “Successful Supervising.” This webcast is available on their website.

NCARB’s Supervision Task Force and the Committee on the IDP developed the *Supervisor Guidelines* and received input from the American Institute of Architects (AIA); American Institute of Architecture Students (AIAS); Association of Collegiate Schools of Architecture (ACSA); Society of Design Professionals (SDA); and AIA’s National Associates Committee (NAC) and Council of Architectural Component Executives (CACE).

ASBOG® Task Analysis Survey Meeting

Richard Moberly, geologist, attended the National Association of State Boards of Geology (ASBOG®) meeting on January 16 and 17, 2009 in Nashville, TN. The purpose of this meeting was to begin the process of preparing and conducting the Task Analysis Survey (TAS) in 2010. The TAS is conducted every five years to determine what licensed/registered geologists and geoscientists across the United States and Canada consider the most important tasks that geologist perform which are necessary to safeguard the health, safety and welfare of the public. A series of 40 to 50 Tasks, divided into the major areas of the geologic profession are provided for consideration.

The results of these surveys are used to update and modify the ASBOG® national licensure examination. It is interesting to note that the practice of geology has been relatively consistent throughout the United States. This has provided a reasonable basis for developing the examinations which are believed to be fair to all candidates across the country.

In the previous TAS (1995, 2000, and 2005), each state that has a registration/licensing law were asked to submit the name of all geologist/geoscientist to the ASBOG® national office. ASBOG® then randomly selected a number of geologists (typically about 200) from each State and Canadian Province to send the survey to. In addition, a number of University Professors within the Geology/ Geoscience Departments across the United States and Canada were also selected to receive the TAS. In the previous 2005 TAS, approximately 7,250 surveys were mailed, with a 50% return rate.

CONGRATULATIONS!

The Kansas State Board of Technical Professions is pleased to announce the following individuals have successfully passed all parts of their Technical Professional examinations and are now licensed.

KSBTP License Renewals are underway for 2009. Licensees may renew online at www.kansas.gov/ksbtp. Look for the Renewal Notice in the **“Bulletin Board Announcement”** section of the web page. Licensees may print the license renewal confirmation, and also print a **pocket card** at the last step of the online renewal process. (See example #1.) You will no longer have to wait to receive your card in the mail. Please remember, your **pocket card** can only be printed at this final step in the renewal process. If you were unable to print this page and still require a pocket card, please call the Board office at 785-296-4400.

Verification of your license can be done at any other time by using the Search feature on the Board's website, www.kansas.gov/ksbtp. Go to the section "Search Individual or Corporate License". The results of your search can be printed and submitted as proof of licensure with bids or for other times you may need proof of your current license status. When using this feature, remember the least data entered provides the best results. For example, use just the license number OR the last name, and check the appropriate box below. (See example #2 for Results Page.)
